

# TUNE OUT THE NOISE

FROM ACADEMY AWARD® WINNER  
ERROL MORRIS

## RETIREMEET10 ATTENDEES ARE INVITED TO SCREEN THIS NEW DOCUMENTARY FILM

You are invited to view a new film about a group of unlikely upstarts who crossed paths at the University of Chicago in the middle of the 20th century, just as computers were first being used to analyze data. That serendipitous, monumental shift enabled them to develop, and then apply, research that turned Wall Street upside down, from its ineffectual investing methods to how those were sold to the public.

It's a story about how finance became a science and challenged the traditional methods of investing. That, in turn, led to the invention of index funds, the founding of Dimensional Fund Advisors—an investment firm dedicated to implementing the science—and the evolution of client-focused financial advice. These advances have benefited generations of investors.
